

Bb Student

A modern, accessible, and delightful mobile learning experience across all devices.

Making it Easier for Your Students to Succeed

Bb Student is Blackboard's new mobile app that enables you to react to your immediate needs and helps you to stay up-to-date on your academic progress and requirements. Bb Student brings a completely new user experience to Blackboard's mobile design and offers you an intuitive way to view and interact with courses, instructors, classmates, and content with emphasis placed on your needs.

We help you to be as successful as you can be by placing learning directly into your hands with the new Bb Student app: it's fun, simple, and intuitive. You can check grades, view announcements, access course content, and complete assignments.

With Bb Student, you can:

- **Exceed your Expectations with the new App Experience**
A modern, yet familiar mobile class experience via the device of your choice.
- **Always-On Environment**
Engage in learning at school, work, home, on the bus, or anywhere in between.
- **Collaboration and Interaction**
Collaboration and engagement between you, other students, and your instructors, through discussions, blogs, journals, and more.

First Time User Experience.

The first time user experience provides an introduction to the Bb Student app. It provides a brief overview of the features and showcases the user experience to help expedite workflows for you and directs you to the content you need the most.

Navigation.

You can easily access updates from your activity stream, view course content, and quickly access all of your grades because we've categorized and grouped the most relevant features for you in one place. You can navigate between activity stream, courses, and grades as well as view notification badges based on course updates and school announcements.

Activity Stream.

The majority of the time you spend in Bb Student will be spent on the activity stream, the home screen. It represents a "smart view" of prioritized events and actions, and pushes content to you. Bb Student does the heavy lifting by helping you prioritize your work so you can spend time on the thing that matters the most, learning.

Course Timeline.

The course timeline provides a visual representation of your courses - past, present, and future. Courses are grouped by term and year with relevant course information displaying such as instructor name, course title, location, and hours.

Course Outline.

This provides you with a familiar way of exploring content, quickly accessing information, and identifying the main materials you need to focus on. Content presentation is simple, clean, straightforward and fun.

Assignments and Tests.

You are able to view, complete, and submit assignments and tests, right in the app.

Grades.

Gives you real-time access to your grades in a comprehensive and friendly format which enables you to quickly identify your academic results and progress in a given class or assignment.

Connecting Cloud Content

Use your cloud-connected accounts including Google Drive, Dropbox, and OneDrive to easily submit cloud content for class assignments.

Collaborate

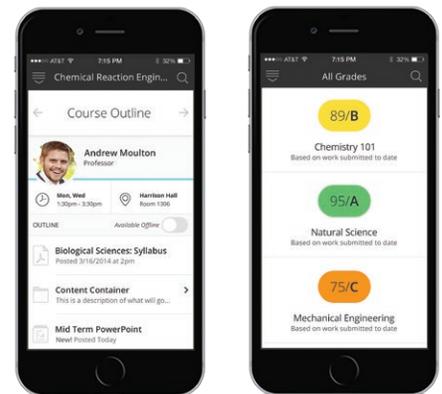

Engage in real-time video conferencing to collaborate with video, voice, files, chat, and interactive whiteboard on the go.

Discussions

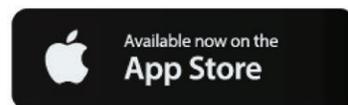

You can now participate in discussions from anywhere via your mobile device. You can create new discussion threads, browse and read posts from others, and craft a response.

Push Notifications

Bb Student will keep you up to date and let you know when a test is coming up or an assignment is overdue. Curious about how you did on your last exam? You'll also get notifications when new grades are posted.
